

## Java Backend Developer (m/f)

### The company

E-commerce continues to grow dynamically and payments are an important part of it. Payments are one of the last big areas ripe for disruption and optile has a superior range of solutions and unique value propositions that will help us to succeed within this growing market.

optile is a Munich-based B2B company that offers an open and provider-independent payment platform to help businesses integrate multiple payment gateways, providers, and methods on a global scale within hours. Our software guarantees online businesses, focused on recurring customers, more freedom of choice and reduced complexity in their payment transactions. optile provides intelligent payment solutions and tools to enable cross provider controlling and scoring, and to help our customers to reduce their operating costs.

With an experienced team of motivated online payment professionals, optile bundles a unique and profound know-how with respect to online payments and e-commerce. Founded in 2010, optile consists of a truly international team of over 30 team members from a wide variety of countries.

### The position

We are expanding and are looking for a smart, enthusiastic person with a passion for software engineering as soon as possible as full-time employee to energetically support the development team in our Munich office on the position of a **Java Backend Developer (m/f)**.

### Key responsibilities

- ▶ writing efficient, reliable and robust code
- ▶ effectively contributing to specification, design, build and test phases of development
- ▶ working closely with energetic and experienced developers and software architects
- ▶ collaborating with IT operations and product managers
- ▶ collaborating with QA engineers and other developers to fix issues and maintain the applications
- ▶ and of course - managing changes and test

### Required skills

- ▶ 2+ years of hands-on experience with Java
- ▶ experience with Spring framework
- ▶ experience with automated testing - JUnit or TestNG frameworks

- ▶ experience with git, Maven, JIRA
- ▶ Eclipse IDE
- ▶ passion for strong engineering practices and building quality software
- ▶ familiarity with agile, iterative design processes
- ▶ bachelor's degree in computer science, computer, software engineering or relevant proven experience and knowledge
- ▶ good communication skills in English

### Desired skills

- ▶ experience with OSGi
- ▶ experience with NoSQL databases
- ▶ development experience with web-based applications (JSP/HTML/CSS/JS)
- ▶ German language skills
- ▶ experience operating in a fast paced, startup environment (i.e. working autonomously, needing little direction, iterating with product managers, etc.)

### What we offer

- ▶ a young, dynamic, and spirited team that knows how to have fun
- ▶ a large, open, and very well naturally lit office and large terrace and lounge
- ▶ central location in a young and upscale quarter with excellent access to public transport (U4/U5)
- ▶ high potential for personal development
- ▶ laptop of your choice (Apple or ThinkPad)
- ▶ an unlimited supply of excellent, freshly ground espresso coffee, soft drinks and fruits

We look forward to hearing from you!
