

## Cloud Scalability Architect (m/f)

### The company

E-commerce continues to grow dynamically and payments are an important part of it. Payments are one of the last big areas ripe for disruption and optile has a superior range of solutions and unique value propositions that will help us to succeed within this growing market.

optile is a Munich-based B2B company that offers an open and provider-independent payment platform to help businesses integrate multiple payment gateways, providers, and methods on a global scale within hours. Our software guarantees online businesses, focused on recurring customers, more freedom of choice and reduced complexity in their payment transactions. optile provides intelligent payment solutions and tools to enable cross provider controlling and scoring, and to help our customers to reduce their operating costs.

With an experienced team of motivated online payment professionals, optile bundles a unique and profound know-how with respect to online payments and e-commerce. Founded in 2010, optile consists of a truly international team of over 40 team members from a wide variety of countries.

### The position

We are expanding and looking for a **Cloud Scalability Architect (m/f)** as soon as possible as full-time employee.

### Key responsibilities

- ▶ taking responsibility for a highly scalable cloud infrastructure
- ▶ selecting and implementing innovative, cutting-edge technologies
- ▶ coordinating, defining and maintaining our payments processing infrastructure, where scalability, high availability, security (PCI-DSS) and performance are mission critical.

### Required skills

- ▶ good understanding of web, middle and data tier scaling concepts (Java application servers, MongoDB, MySQL)
- ▶ good understanding of network scaling concepts (e. g. load balancing)
- ▶ strong knowledge of Linux (preferably Ubuntu / Debian)
- ▶ experience with cloud providers and technologies (public and private) technologies
- ▶ fluency in English and German

- ▶ excellent analytical, problem-solving and communication skills

### Desired skills

- ▶ knowledge of deployment automation, configuration management and scripting
- ▶ project coordination experience and familiarity with agile methodologies
- ▶ experience operating infrastructure with high security requirements

### What we offer

- ▶ a young, dynamic, and spirited team that knows how to have fun
- ▶ a large, open, and very well naturally lit office and large terrace and lounge
- ▶ central location in a young and upscale quarter with excellent access to public transport (U4/U5)
- ▶ high potential for personal development
- ▶ laptop of your choice (Apple or ThinkPad)
- ▶ an unlimited supply of excellent, freshly ground espresso coffee, soft drinks and fruits

We look forward to hearing from you!
